

# Getting started Guide for: nanonavi VC for iPhone

## nanonavi VC Introduction:

nanonavi VC is an application you can plug in on social networks and download to your mobile phone, which mashes up all the relevant profile information of friends and family from every major social network to map to locations using GPS on any GSM network in the world.

However, nanofinder devices are controlled by you through your nanonavi mobile application to ensure **Virtual-Care™**. For more information, you can visit our website [www.nanonavi.com](http://www.nanonavi.com)

## Download nanonavi VC:

Download our iPhone application from iTunes or click App Store on your iPhone. Search **nanonavi VC** and click **"BUY NOW"**. The application will automatically download, sync/install to your iPhone.

Download nanonavi on iTunes.

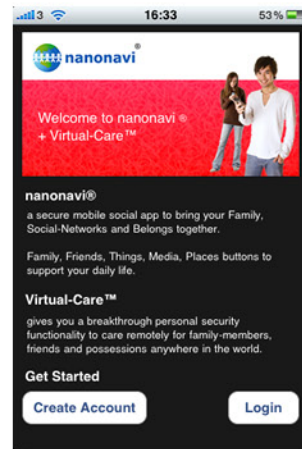

Download nanonavi from iPhone.

## Registration and Login:

After open the application, simply tap **"Create Account"**. and type in some personal information, your account will be create and you can start using. Moreover, if you like to, you can linkup nanonavi with social network accounts or import your friends from address book and webmail accounts.

## Basic Operations:

Please refer to the nanonavi iphone getting started guide.

## Virtual-Care™:

Virtual-Care™ provides caring, alerting and finding for children, elders, pets and assets like cars, boats.

- Establish a "Net of Care" by adding trusted family & friends from all user social networks into a users network of care providers.
- Care providers are alerted right-away in case of a problem via their mobile-phone, social network or SMS.
- Set a "Geofence" around children, elderly family members, pets or assets.
- Communicate instantly with care providers and the person having the problems.
- Track the location history of people, pets and possession being cared for.
- Move and assign small nanofinder devices to different people and possessions as needed.

You can start using Virtual Care by **clicking on your own marker > details > Virtual Care**.

**You can also refer to the nanofinder user manuals on setting up nanofinder on nanonavi VC.**
